Order Quantities: It is an industry rule of thumb to purchase at least 10% more tiles than you expect to use in case of miscalculations and/or damage during shipping. It is also recommended to store a few extra matching tiles in case damaged tiles need to be replaced in the future. Square foot coverages for porcelain products are based on 1/16" grout joints. If a different grout joint size is used the square foot coverage will change. Remember all order confirmations include square footage, pieces, price per piece and price per square foot. Accommodations for your design layout should be considered when reviewing the order confirmation.
