- Materials & Resources MR 4.1 Recycled Materials 10% (1 Point)
- Materials & Resources MR 4.2 Recycled Materials 20% (2 Points)
- Materials & Resources MR 5.1 Regional Materials 10% (1 Point)
- Materials & Resources MR 5.2 Regional Materials 10% (1 Point)
- Sustainable Sites SS 6.1 Stormwater Control - Quantity (1 Point)
- Sustainable Sites SS 6.2 Stormwater Control - Quality (1 Point)
- Sustainable Sites SS 7.1 Heat Island - Non-Roof (1 Point)
- Sustainable Sites SS 7.2 Heat Island - Roof (1 Point)
- Innovation in Design Process ID 1-1.4 Innovation in Design (1-4 Points)

***Additional recycled content can be added to custom orders upon request**

Additional Environmental Attributes:

All ARTO products are manufactured in Gardena, CA with regionally sourced raw materials. ARTO products include varying levels of recycled content and additional recycled content may be added to custom orders. ARTO offers 12 colors that have been tested and certified to reduce the heat island effect per LEED guidelines (additional colors may qualify after testing). ARTO pavers can help to reduce the quantity and improve the quality of stormwater runoff when used as a part of a permeable pavement system. ARTO products have a long life span, thanks to their durable concrete composition, and can be recycled if your needs change.
